Development Economics graduate with a strong interest in Data Analytics, Business Analytics, and Business Intelligence. I have a foundation in quantitative analysis and skills in data processing, analysis, and visualization to generate insights that support data-driven decision-making. I am proficient in MySQL, Python (Pandas, NumPy, Matplotlib, and SciPy), Microsoft Excel, Power BI, Tableau, and STATA. I continuously develop my technical skills through self-directed learning, professional training, and online certifications. I am seeking internship opportunities in Data Analytics, Business Analysis, or Business Intelligence where I can further develop my analytical and technical skills while contributing to business decision-making through structured, data-driven insights.

Education

UIN Syarif Hidayatullah Jakarta – **Tangerang Selatan** Sep 2021 – Mar 2026

Bachelor of Economics (B.E.) in Development Economics, (GPA: 3.34/4.00).

- Graduate in Development Economics – 140th Graduation Ceremony (2026).
- Undergraduate thesis: *Analysis of the Impact of Energy and Non-Energy Subsidies on Poverty in Indonesia Using the Autoregressive Distributed Lag (ARDL) Model.*
- *Conducted time-series econometric analysis using STATA to evaluate short-run and long-run relationships while interpreting empirical findings for policy recommendations.*

Technical Skills

- **Programming Language** : Python
- **Query & Analytical Languages** : SQL, DAX
- **Data Analysis & Libraries** : Pandas, NumPy, SciPy, Matplotlib, Seaborn
- **Databases** : MySQL
- **Data & AI Platforms** : Databricks
- **BI & Visualization** : Power BI, Tableau, Microsoft Excel, Google Looker Studio
- **Statistical & Econometric Tools** : STATA, IBM SPSS
- **Version Control & Repository** : Git, GitHub

Projects

E-Commerce Profitability & Marketing Analysis — BrightCart *(MySQL, Python/Pandas, PowerBI)* *Portfolio Project 2026*

- Analyzed 2,000+ e-commerce transactions using MySQL and Python/Pandas to evaluate profitability across product categories, sales channels, returns, and marketing performance.
- Developed interactive Power BI dashboards to track revenue, profit margin, channel profitability, loss rates, and marketing ROAS, translating findings into actionable business recommendations.
- Identified Marketplace as the highest-risk sales channel with a 36.99% loss rate and analyzed low-ROAS marketing segments to support a targeted 20% budget reduction strategy.

Loan Default Risk Analysis – Horizon Financial Group *(Python/Pandas/SciPy, Power BI)* *Portfolio Project 2026*

- Analyzed 601 loan records using Python/Pandas to investigate default patterns across credit scores, DTI ratios, interest rates, and borrower segments.
- Conducted statistical testing using SciPy and developed Power BI visualizations to examine relationships between borrower characteristics and loan defaults.

- Identified an overall default rate of 24.29% and a higher observed default rate among borrowers with lower credit scores, supporting recommendations for enhanced credit risk assessment.

Asheville Airbnb Listings Analysis *(MySQL, Power BI)* *Portfolio Project 2026*

- Analyzed Airbnb listing and review data using MySQL to evaluate pricing, demand patterns, neighbourhood performance, and host activity across Asheville.
- Performed exploratory and comparative analysis using SQL, including pricing analysis, room-type distribution, review trends, neighbourhood activity, and host performance.
- Connected MySQL to Power BI to develop interactive visualizations and translate findings into data-driven recommendations for hosts and potential investors.

Work Experience

Starbucks Coffee Indonesia – **Tangerang Selatan** Aug 2023 – Mar 2025

Part-Time Barista

- Handled daily cash transactions and reconciled payment records to ensure transaction accuracy.
- Monitored inventory levels and supported stock management to maintain operational efficiency.
- Maintained accurate operational records and followed standardized procedures in a fast-paced environment.

Certification & Training

IBM

- *Introduction to Data Analytics — IBM Data Analyst Professional Certificate (Module 1, Completed)* 2026
- *Excel Basics for Data Analysis — IBM Data Analyst Professional Certificate (Module 2, Completed)* 2026

Alex Freberg

- *Data Analyst Bootcamp* 2026

RevoU

- *Intro to Data Analytics* 2025

MySkill

- *Microsoft Excel: Pivot Table in Microsot Excel* 2026

Ioda Academy

- *Financial Analyst Bootcamp* 2026

EF SET

- *EF SET English Certificate (CEFR B2 Upper Intermediate, Score : 55/100)* 2026

Languages

- Bahasa Indonesia (Native).
- English (Professional Working Proficiency).
